A PAL DESIGN  
FOR A DIGITAL LIFE

# INTHELP PRO

IntHelp pro is a progressive design intended to middle age wearers who make intensive use of digital devices such as smartphones and tablets. This design reduces the strain in the near vision zone and increases the overall comfort through the use of the robust WFRT optimization technology and the Smart Inset. Moreover, the adaptation process is made easier and immediate, in particular when IntHelp design has been previously used as first PAL.
